NORTH-HOLLAND

SUBJECT INDEX OF VOLUME 72*

Dynamics

Exact transfer and stiffness matrices for a beam/column resting on a two-parameter foundation, D. Karamanlidis and V. Prakash (1) 77 – 89
A sixth-order modification of the Stiefel–Bettis method for nonlinearly damped oscillators, R.K. Jain and R. Kumar (2) 187 – 193
An efficient, accurate, simple ALE method for nonlinear finite element programs, D.J. Benson (3) 305 – 350

Elasticity

Optimal topologies of truss structures, U. Kirsch (1) 15 – 28
Large displacement analysis of space-frame structures, J.L. Meek and S. Loganathan (1) 57 – 75
Exact transfer and stiffness matrices for a beam/column resting on a two-parameter foundation, D. Karamanlidis and V. Prakash (1) 77 – 89

Electronics

A novel computational approach for the analysis of transient and steady-state processes in an LC chopper, Z. Kremer and M.A. Slonim (1) 1 – 13

Finite difference methods

A novel computational approach for the analysis of transient and steady-state processes in an LC chopper, Z. Kremer and M.A. Slonim (1) 1 – 13
On convergence of solutions for FDM with irregular mesh in Neumann problem, A. Karafiat (1) 91 – 103

Finite element and matrix methods

Optimal topologies of truss structures, U. Kirsch (1) 15 – 28
Shape optimization in laminated composite plates, M.S. Lee, N. Kikuchi and R.A. Scott (1) 29 – 55
Large displacement analysis of space-frame structures, J.L. Meek and S. Loganathan (1) 57 – 75

* The issue number is given in front of the page numbers.

Exact transfer and stiffness matrices for a beam/column resting on a two-parameter foundation, D. Karamanlidis and V. Prakash (1) 77 – 89
On drilling degrees of freedom, T.J.R. Hughes and F. Brezzi (1) 105 – 121
Adaptive contact elements for three-dimensional explicit transient analysis, R.F. Kulak (2) 125 – 151
A general approach to nonlinear FE computations on shared-memory multiprocessors, C. Farhat and L. Crivelli (2) 153 – 171
Total Lagrangian formulation for large-displacement analysis of the triangular finite elements, A.A. Shabana and S.K. Niamathullah (2) 195 – 199
On mixed finite element methods for axisymmetric shell analysis, A.F.D. Loula, I. Miranda, T.J.R. Hughes and L.P. Franca (2) 201 – 231
The C^0 shell plate and beam elements freed from their deficiencies, D. Briassoulis (3) 243 – 266
On a stress resultant geometrically exact shell model. Part I: Formulation and optimal parametrization, J.C. Simo and D.D. Fox (3) 267 – 304
An efficient, accurate, simple ALE method for nonlinear finite element programs, D.J. Benson (3) 305 – 350
Nonholonomic computer analysis of elastoplastic frames, F. Tin-Loi and M.B. Wong (3) 351 – 364

Miscellaneous topics

Subdifferential and variational formulations of boundary value problems, G. Alduncin (2) 173 – 186

Nonlinear mechanics

Large displacement analysis of space-frame structures, J.L. Meek and S. Loganathan (1) 57 – 75
Exact transfer and stiffness matrices for a beam/column resting on a two-parameter foundation, D. Karamanlidis and V. Prakash (1) 77 – 89
A general approach to nonlinear FE computations on shared-memory multiprocessors, C. Farhat and L. Crivelli (2) 153 – 171
A sixth-order modification of the Stiefel–Bettis method for nonlinearly damped oscillators, R.K. Jain and R. Kumar (2) 187 – 193
An efficient, accurate, simple ALE method for nonlinear finite element programs, D.J. Benson (3) 305 – 350
Nonholonomic computer analysis of elastoplastic frames, F. Tin-Loi and M.B. Wong (3) 351 – 364

Numerical solution procedures

On convergence of solutions for FDM with irregular mesh in Neumann problem, A. Karafiat (1) 91 – 103
Adaptive contact elements for three-dimensional explicit transient analysis, R.F. Kulak (2) 125 – 151
